***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-30 are drawn to digital watermarks that obfuscate the digital information; classified in class 705 subclass 57.
  - II. Claims 31-37 are drawn transferring digital data, classified in class 705 subclass 50.
  - III. Claims 38-42 are drawn to transmitting encoded CDMA data, are classified in class 705 subclass 51.
  - IV. Claims 44-61 are drawn to watermarking an MPEG bitstream, classified in class 705 subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed such as a utilizing CDMA data or an MPEG bitstream. The subcombinations have separate utility such as utilizing CDMA data or an MPEG bitstream.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
